

Y6 Learning Journal

Week Beginning 11/9/17

RE-Loving

We have all spent time reflecting on our families and God's unconditional love for us.

We have produced some creative art work linked to this.

Numeracy

In Year 6 have been learning consolidating some key mathematics skills from the Year 5 curriculum. We have further developed our knowledge of place value, fraction, decimal and percentage equivalences and volume.

Literacy

We have written some detailed recounts about our visit to Cow Green Reservoir. We presented these to the rest of the class and invited constructive criticism.

Science/Geography

In Year 6 we are studying Living Things and their Habitats. We have begun our research on the characteristics of living things whilst on our class visit to Cow Green Reservoir. We had a fantastic time...even though we all got soaked to the skin!
