

## Y6 Learning Journal

Week Beginning 4/9/17

### RE-Loving

We have all spent time reflecting on our current topics Big Question 'Do we have to earn love?' We have discussed the importance and need for unconditional love.

### Numeracy

In Year 6 have been learning consolidating some key mathematics skills from the Year 5 curriculum. We have further developed our knowledge of place value and addition calculations.

### Literacy

We have been learning all about how to write an autobiography. We read a selection of short autobiographies on some well-known historical figures. From this we planned, using the Simple Mind App on our I-pads, and wrote some brilliant autobiographies.

### Science

In Year 6 we are studying Living Things and their Habitats. We have begun our research on the characteristics of living things and looked at the structure of a flower. We will develop this during our visit to Cow Green reservoir, next week.
