

Y6 Learning Journey
Week Beginning 26/2/18

RE- Unity

We are working really hard in our RE topic **Unity**. We have spent time reading a selection of prayers for peace and unity. We used some of the ideas from these prayers to write our own prayer for unity in the world. We planned a shared class Collective Worship so that we could celebrate the end of our **Unity** topic.

Numeracy- Problem Solving and Reasoning

We have focused on using our calculation skills to answer a range of problem. We had to read the problems very carefully and then decide the best way to tackle the problem.

We tried to make sure we were efficient in the methods we chose.

Parents were also invited into class so that they could help us use our reasoning skills to solve a range of problems! Some of them were really tricky...but we persevered and our parents were really impressed.

Literacy-Reading

We enjoyed taking part in extra reading activities to celebrate World Book Day/Week.

We are working hard at improving our speed reading so that we can complete small given texts in an allocated length of time. This should really help us when we complete our reading assessments at the end of Year 6.

LORIC-Snowman Building

Some of the class had great fun, working in teams, to see who could build the most creative snowman! It was great fun and we developed our collaboration, perseverance, organisation and team building skills.
